

Mazikeen Buer

Software Engineer

SUMMARY

Innovated, detail-oriented, software engineer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications with strong understanding of HTML, CSS, and Javascript. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100Devs, Los Angeles, CA

January 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Integrated API's to reduce time spent on inputting data

Recent Projects:

Don Diego's Restaurant – Full online menu with food item images and option for customers to place and provide payment online.

The Book Worm (Fullstack Web App) – Users can login to their profile and find their logs of different categories of books including recently read and next books.

One Stop Freight (Fullstack Web App)– A tracking system for freight tracking for thousands of shipments worldwide via various methods of transportation including air, ocean, and land. Designed for businesses to monitor the chain of custody with features to imitate the cargo based on dimensions and plan transportation accordingly.

Other Projects: Pure Beauty Hair Salon, SpaceViewers Society of Los Angeles Web App with NASA API integration, Guadalupe's Secret Eats, and many more.

Full Stack Web Developer at Maze Creative Development | Los Angeles, CA

January 2022 — Present

- Built responsive full stack web applications for desktop and mobile devices.
- Created e-commerce applications for businesses with simple and easy user interface
- Increased client revenue with static websites and landing pages for small and medium size businesses range from local restaurants to global chains.

Senior Import Agent at Nippon Express | El Segundo, CA

September 2019 — January 2022

- Led a team to provide and update cargo transportation tracking using our terminal system for hundreds of shipments daily.
- Increased business revenue in the import department 100K a month by optimizing transportation strategy while meeting arrival deadlines.
- Coordinated with various department heads such as sales, warehouse, and traffic center to monitor and ensure integrity of each shipment is met to standard with little to no damage or discrepancies
